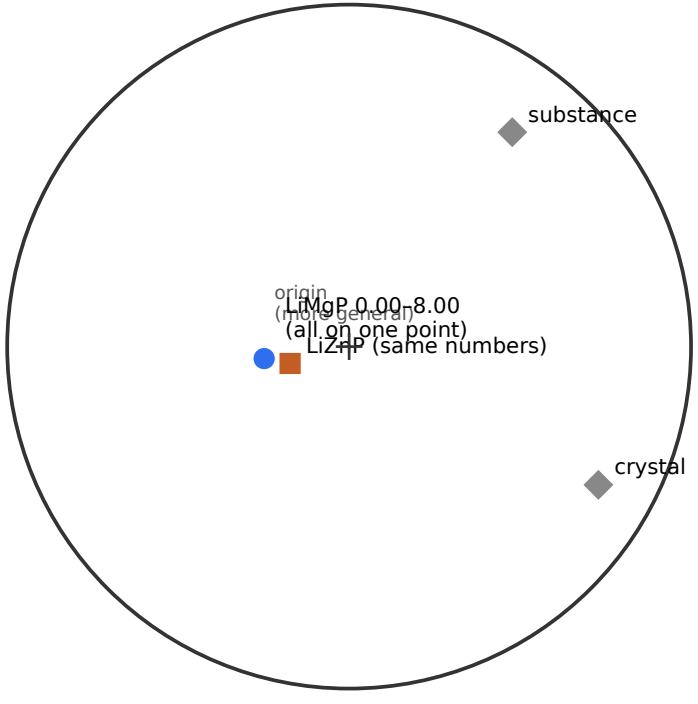
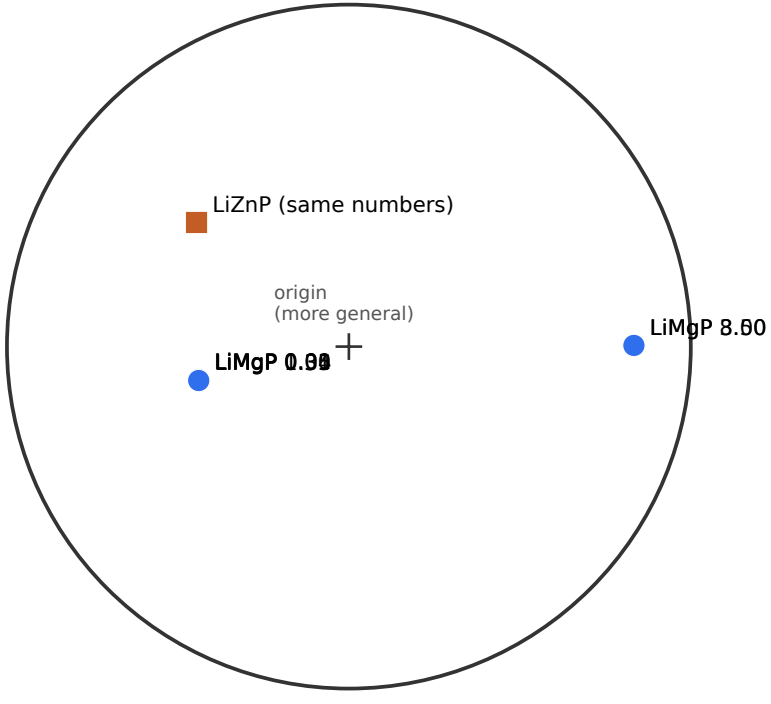
Poincaré disk — same geometry OnT uses — origin = more general

(a) OnT space v = encode(sentence)



(b) Export vector z = concat(v, numbers) (materials only)



Blue = LiMgP (only band gap changes) Orange = LiZnP, same numbers Grey = class names

Pair	OnT distance on v	Distance on z (concat)
LiMgP 0.00 vs 0.01 eV (similar numbers)	0.11	0.04
LiMgP 0.00 vs 8.00 eV (different numbers)	0.11	4.01
LiMgP vs LiZnP (same numbers, different word	3.81	1.24
